**BSc Zoology** 2009

Kannur University

## 🔬 PROJECTS

### Vermicompost preparation from plant debris and cattle dung

A mixture of waste paper, plant debris and cow dung in the ratio 1:1:1: was found to be the best ratio than 3 (paper waste): 2 (cattle dung) and 5 (plant debris). In 60 days time excellent quality and quantity of compost was produced by three earthworms.
