EXECUTIVE SUMMARY

Experienced professional with a strong background in procurement, supply chain management, and healthcare operations. Demonstrated success in driving cost-effective purchasing, optimizing inventory management, and ensuring efficient distribution. Proven ability to collaborate with diverse stakeholders, including healthcare professionals and cross-functional teams, to achieve organizational goals and track record of delivering results in fast-paced and dynamic environments. Committed to delivering excellence in healthcare supply chain management and improving patient care outcomes.

PROFESSIONAL EXPERIENCE

➤ SENIOR BUYER, PURCHASING AND SUPPLY CHAIN MANAGEMENT DEPARTMENT

THE AGA KHAN UNIVERSITY HOSPITAL, KARACHI

February 2019 – March 2024

- Develop and implement procurement strategies to ensure cost-effective purchasing of goods and services while maintaining high-quality standards.
 - Conduct market research to identify potential suppliers nationally and internationally, evaluate their capabilities, and negotiate favorable terms and conditions for procurement contracts.
 - Ensure timely and cost-effective fulfillment of participating organizations' requirements in the AKDN P Group Purchase Program.
 - Review and analyze purchase requisitions, identify suitable suppliers, and initiate requests for proposals (RFPs) or requests for quotations (RFQs) as needed.
 - Evaluate supplier proposals, negotiate pricing and terms, and select the most appropriate suppliers based on quality, reliability, and cost-effectiveness.
 - Manage supplier relationships and monitor their performance, ensure timely delivery of goods and services, and resolve any issues or disputes that may arise.
 - Maintain accurate records of procurement activities, including purchase orders, contracts, and supplier information, and ensure compliance with organizational policies and procedures.
 - Monitor market trends and industry developments to identify opportunities for cost savings, process improvements, and potential risks in the supply chain.
 - Collaborate with cross-functional teams, such as Finance, Legal, and Operations, to ensure alignment and adherence to procurement objectives and regulations.
 - Develop and implement strategies for effective procurement operations in accordance with ISO and JCIA guidelines.
 - Continuously seek opportunities to streamline procurement processes, leverage technology solutions, and implement best practices to enhance efficiency and effectiveness.
 - Sourcing of Laboratory Value Chain, Q/A chemicals, machinery parts, and their maintenance, as per CAPEX & OPEX and Maintenance, Repair, and Operating (MRO) rules where required, achieving 90% and more accuracy in on-time deliveries.
 - Review and control freight costs through informed decisions.
-

➤ **SUPPLY CHAIN OFFICER**

THE AGA KHAN DEVELOPMENT NETWORK – AKDN

November 2016 - February 2019

- Ensure compliance requirements and maintain the necessary documentation and records.
- Manage all aspects of the supply chain including sourcing, procurement, purchasing, transport, warehousing, and distribution.
- Plan and coordinate the distribution activities to ensure timely and efficient delivery of products to the Outreach locations.
- Monitor and manage the expiry dates of medicines and ensure the timely return of all expired and near-expired products to the vendor for fresh stock.
- Collaborate with the sales team to forecast demand and align distribution activity accordingly.
- Coordinate with logistics providers to arrange and optimize transportation routes and nodes for product distribution.
- Monitor inventory levels to ensure sufficient stock level.
- Constantly review and enhance operational processes to meet supply chain standards and drive business process improvements.
- Ensure maintenance and storage of medicines according to temperature specifications.
- Maintain an optimum stocking level of MRO inventory to ensure the required level of reliability.
- Collaborate with relevant stakeholders to ensure compliance with regulatory requirements and quality standards.
- Develop and implement strategies for effective management of bulk store and warehouse operations in accordance with ISO and JCIA guidelines.
- Monitor key performance indicators (KPIs) related to the bulk store and warehouse operations and implement necessary improvements.
- To ensure that GRIN and RTV are timely and correctly processed so that payments should be made timely to the vendors in coordination with the Finance Department.
- Monthly visit Outreach locations for audit.
- Facilitate seamless coordination with cross-functional teams, such as Finance, Operations, and Quality Assurance, to foster integration and alignment across various organizational functions, contributing to the achievement of overall operational objectives.
