

# MUNEEB TAHIR

I am with a desire to explore myself in an atmosphere where my skills and abilities become fruitful for my institution and where I can put my all the energy to bring dramatic changes in the field I work and which will have great measurements for the success of the student and institution I work for. My priority always will be to make a leader out of a student, and to serve my people, my country and to make my institution and nation powerful amongst all. I believe in smart work more than hard work, quality more than quantity!
