### \*\*\*\* EXECUTIVE SUMMARY \*\*\*\*

- Conducted thorough dental examinations
- Accurately diagnosed endodontic conditions through the use of radiographic imaging and diagnostic tests.
- Examined teeth, gums, and related issues, using sterilized dental instruments and diagnostic equipment such as x-rays and IOPA
- Followed infection control protocols and used PPE as recommended by the CDC prior to initiating treatment.
- Treated exposure of pulps partially by pulp capping/pulpotomy or totally by removing the pulp/pulpectomy. Treated infected and necrotic root canals by cleaning and shaping all canals.
- Sealing canals with bio-inert, bioactive, and biocompatible material to prevent microbial infection and promote periapical healing.
- Performed retreatment of teeth that have previously undergone poor root canal treatment and successfully recovered the tooth under constant radiographic examination for pre- and post-determined prognosis with optimum treatment outcome.
- Performed numerous complex root canal treatments, utilizing advanced endodontic techniques and state-of-the-art equipment to successfully treat patients and alleviate dental pain.
- Bleached discoloured teeth to restore their natural color.
- Collaborated with a multidisciplinary team of dental professionals, to develop comprehensive treatment plans and ensure optimal patient outcomes
- Conducted endodontic treatment for all anterior and posterior teeth, except for third molars.
- Provided compassionate patient care, explaining treatment options in a clear and concise manner and addressing any concerns or questions to enhance patient satisfaction and improve overall dental health.
- Performed single and multiple-visit endodontic therapy within 25-40 minutes for the affected tooth, followed by full coverage porcelain fused metal crown.
