Profile

I've been working as a Principal Service Support Analyst for over 4.1 years, providing full technical support for the company's products and solutions involving PKI, cryptography, and digital signatures. In addition, I have over twelve years of experience in (Client/Server) Application and Database Development on top financial projects in North America, Australia, and Far East Asia. A Team player who is proactive and industrious, with the ability to multitask, find improvements in software development processes, and efficiently execute feasible solutions.

PKI, digital Signatures, ADSS Server, and SigningHub domain competence, as well as Finance and leasing and ERP module development and deployment. Work effectively with others and thrive in a team environment. I enjoy working both as a team member and alone.

Work Experience

Principal Service Support Analyst

February 2021 – Present

Ascertia (Pvt) Limited

Lahore, Pakistan

<https://www.ascertia.com/>

Environment

ADSS Server, SigningHub,
