CORE COMPETENCE

- Expertise in planning, executing, and monitoring logistics operations to ensure timely delivery and smooth transit.
- Proficient in managing inventory control, and stock levels, and ensuring efficient storage and retrieval of goods
- Skilled in LIFO and FIFO methods, conducting cycle counts, and reconciling discrepancies.
- Implement effective monitoring and tracking systems to oversee shipments both in transit and at ports, preemptively managing any issues to avert demurrage charges.
- Supervise the receiving, picking, and stacking processes, emphasizing accurate preparation and meticulous documentation (including GRN, SRN, STO, and MRQ).
- Strategize and execute stock takes and cycle counts to minimize inventory discrepancies, taking corrective measures as necessary.
- Generate comprehensive reports on inventory movements and periodic inventory aging for managerial assessment and clearance sales.
- Maintain clean, safe, and organized work environments while adhering to safety protocols.
- Maintain open communication with vendors to address inquiries regarding ordered merchandise, ensuring seamless operations.

DECLARATION

I hereby confirm that the above mentioned information is accurate and truthful to the best of my knowledge and belief.
