Matric- Science	City District Government Boys High School, Shahdara Town, Lahore, Lahore	89%	2014

Experience 3 years

Company	Designation	Duration	
Pakistan Army	Maintenance and Repair Manager	May 2021 - May 2024	3 years

Work History

Pakistan Army	May 2021 - May 2024 (3 years)
---------------	-------------------------------

Maintenance and Repair Manager Mangla, Pakistan

My role within the Corps of Electrical and Mechanical Engineers (EME) in the Pakistan Army, included a range of responsibilities focused on ensuring the operational readiness and maintenance of military equipment and machinery. Here's a detailed outline:

- Maintenance and Repair:** Responsible for the upkeep, repair, and servicing of a variety of mechanical and electrical systems, including vehicles and weaponry.
- Project Management:** Managing and executing engineering projects, which could include upgrades, modifications, and the integration of new technologies into existing systems.
- Logistics Support:** Supported logistics operations by coordinating the supply, storage, and distribution of spare parts and tools needed for maintenance activities.
- Inspection and Testing:** Regular inspections and tests were part of duties to ensure that equipment met operational standards and safety regulations.
- Team Leadership and Training:** Led and trained junior personnel in the proper maintenance and repair procedures, as well as in the use of technical equipment.
- Safety and Compliance:** Ensuring that all engineering activities comply with safety regulations and standards, minimizing risk and promoting a safe working environment.
- Human Resource Management:** Overlooking the workforce planning, recruiting, talent management and development. Providing leadership and advisory role. Ensuring policy development and compliance.

This role required a combination of technical expertise, problem-solving skills, and leadership abilities to effectively support and enhance the operational capabilities.
