Summary and Goals

I am a recent graduate with a degree in Computer Engineering, equipped with a year and a half of hands-on experience in the field of networking. During my studies and work experience, I have developed a solid foundation in network design, implementation, and troubleshooting. My goal is to leverage my technical skills and knowledge to contribute to a dynamic team, where I can continue to grow professionally while helping the organization achieve its objectives. I am particularly interested in roles that offer opportunities for continuous learning and advancement in network technologies.

Work Experience

2023-02-10 - now

Network Manager – Rooteplus

Managed design, implementation, and maintenance of company network infrastructure. Led team of engineers, ensured network security, reliability, and performance. Collaborated cross-functionally on technology implementation and compliance. Enforced network standards, conducted audits to mitigate risks, supported company growth goals.
