Profile:

Dedicated warehouse manager with one year of experience in inventory management and team leadership. Seeking to leverage skills in logistics and operational efficiency.

Academic Background:

- Bachelor of Engineering in Electrical & Electronics (2017) Al Ameen Engineering College - Shornour - Calicut University Kerala
- Diploma in Building MEP System

Career History:

*Orange Freight & Logistics, Beira, Mozambique

From 2023 Sep to 2024 Aug

Dedicated and detail-oriented warehouse manager with one year of experience in overseeing operations, managing inventory, and leading teams. Seeking to leverage expertise in logistics and process improvement to contribute to a dynamic organization.

Key Responsibilities:

- Managed daily warehouse operations, ensuring efficient workflow and adherence to safety protocols.
- Oversaw inventory management, including stock audits and implementation of control systems.
- Coordinated logistics for incoming and outgoing shipments, ensuring timely and accurate delivery.
- Trained and supervised a team of 15 staff, fostering a collaborative and productive work environment.
- Creating costing reports, fuel and machine details, and updating stock reports every day

Professional Summary:

- Warehouse area: 12,000 square meters
- managing three different kinds of cargo chemicals, fertilizers, and polymers.
- The bulk cargo handling 20000 mt is fertilizer; the inbound freight handling 14000 mt is polymer which is 25 kg and 1000 kg bags; and the chemical handling 40000 mt.

- All incoming freight is outgoing within a week.
- Managing sea cargo
- Operation determines loading and offloading. One day a lot of containers are being unloaded, and another day a lot of trucks are being loaded. Every day, about ten containers are offloaded and fifteen trucks are loaded.
- Forklifts and monito are used in loading and unloading activities.

Receiving Goods:

- Inspection: Check incoming shipments for damage or discrepancies against purchase orders.
- Documentation: Ensure all paperwork is accurate and complete, including bills of lading and packing slips.
- Storage: Assign items to designated storage locations based on inventory management systems.

***SR constructions, Manjeri , Kerala**

From 2017 Nov to 2023 July

Key Responsibilities:

- **Design & Planning:** Developed detailed electrical designs, blueprints, and layouts for commercial, residential, and industrial construction projects, ensuring compliance with safety codes and standards (NEC, IEC, etc.).
- **Project Management:** Managed electrical aspects of construction projects from inception to completion, including budgeting, scheduling, and coordination with architects, contractors, and other engineering disciplines.
- **Installation Oversight:** Supervised the installation of electrical systems such as lighting, power distribution, fire alarms, and communication systems, ensuring high-quality workmanship and compliance with project specifications.
- **Safety Compliance:** Conducted safety audits and ensured electrical systems adhered to OSHA, building codes, and other local safety regulations.
- **Testing & Commissioning:** Led testing, troubleshooting, and commissioning of electrical systems, including power distribution networks, emergency backup systems, and electrical equipment.
- **Vendor & Material Management:** Coordinated with suppliers and contractors for sourcing electrical components and materials, ensuring timely delivery and adherence to project specifications.
- **Documentation & Reporting:** Prepared technical reports, electrical load calculations, cost estimates, and documentation for project approvals and inspections.
