Interest

I am interested in observing the fast-changing world with futuristic lenses of optimism for creating and seeking opportunities for my personal, familial, professional, organizational and societal well- being. In addition, serving with collective, collaborative and diverse individual genius and minds prove fascinating to me. Moreover, being the student of language, the study of language at both micro and macro level interests me. More specifically, I find the fields of psycholinguistics and cognitive linguistics extremely interesting and appealing as it provides us with great insights about language and mind; the study of their interrelationship serving as ‘the window into the human mind’ as Steven Pinker has mentioned.
