● HOBBIES AND INTERESTS

Reading Books and Articles about Data Analytics and Business

Intelligence:

- I enjoy reading books and articles on the latest techniques in data analytics, business intelligence methodologies, and innovative data visualization strategies. This keeps me up-to-date with new trends and developments in the field.

Exploring Articles on AI and Machine Learning in Data Analysis:

- I stay informed about advancements in artificial intelligence and machine learning and their applications in data analysis by regularly reading relevant articles and research papers. This helps me deepen my understanding of AI-driven data strategies.

Hands-On Projects with Power BI and Tableau:

- I often work on personal and freelance projects using Power BI and Tableau to create interactive dashboards and reports. This allows me to continually improve my skills and stay current with new features and best practices.

Analyzing Market Trends and Data-Driven Insights:

- I dedicate time to exploring and analyzing new trends and innovations in data analytics, including emerging tools, techniques, and industry best practices. This helps me adapt and innovate in response to the evolving market dynamics.

● **VOLUNTEERING**

Data Analyst Volunteer | Online Communities and Facebook Groups

- Helped individuals and small businesses solve data analysis problems by actively participating in online communities and Facebook groups.
- Assisted users with challenges in using Power BI and Tableau, guiding them to create effective data visualizations and reports.
- Provided troubleshooting support and shared best practices for using these tools, helping users improve their skills and confidence.
- Created and shared tutorials and resources on data analysis techniques and tools to support community members in their learning journey.
- Fostered a supportive and collaborative environment, encouraging knowledge sharing and continuous learning among group members.
