Experience

NATIONAL SAMPLE SURVEY OFFICE(NSSO), GOVT OF INDIA

Survey Enumerator | Aug 2017 – March 2019, Sep 2020-Nov 2024
(6+years)

- Data Collection & Management of important govt survey like Socio Economic survey, Time Use Survey etc. This survey is a systematic process used to gather data about the social and economic conditions of individuals, households, or communities. The information collected helps in understanding the living standards, income levels, employment status, education, health and these data used for planning and implementing policies, programs, and projects aimed at social development and economic growth.
 - Developed digital Urban Frame Survey (UFS) maps using satellite geo-tagging and QGIS software. These maps are created exclusively for towns and cities, with each map comprising blocks containing 120–150 households. These blocks are used for urban area sampling in government surveys, where surveying these specific blocks can represent the entire town or city for various parameters.
 - Data collection and supervise the survey **CPI and WPI** which measures inflation and understanding price dynamics in an economy. Both indices play distinct but complementary roles in assessing economic health, guiding monetary policy, and supporting decision-making by businesses, policymakers, and researchers.
-

- Selecting a representative sample of the population or households to ensure diverse coverage, and contacting local government or non-government bodies to inform them about the process and significance of the survey. The process begins with creating a map of the village or sample area, listing each family, and then selecting sample households for further detailed information.

FOREVER LIVING PRODUCT, NETWORK MARKETING
